

AIR-POWERED/ PNEUMATIC OIL EXTRACTOR PUMP 70L

Brand: AWTOOLS
Reference: AW10415BL
EAN: 5903678611538

410mm
MM

23kg
WAGA

KEY FEATURES

- Durable, powder-coated steel construction ensures a long service life and resistance to workshop conditions.
- Powered by compressed air, the unit uses a vacuum system for fast, efficient oil extraction.
- Dual operation supports both vacuum extraction via dipstick probes and gravity draining via an adjustable bowl, allowing flexible operation depending on the vehicle and service method.
- Equipped with a transparent tank for visual fluid inspection, a pressure gauge, and a regulator with a safety valve for precise, safe operation.
- Integrated system allows extraction from multiple points and quick tank discharge using compressed air.

- Designed for mobility, it features two fixed and two swivel wheels, along with a sturdy handle for easy transport around the workshop.
- Suitable for extraction, transport, and disposal of engine oil, transmission fluid, and differential oil.
- Ideal for automotive workshops, mechanical services, and fleet maintenance facilities.

TECHNICAL DATA

- Main tank capacity: 70.
- LControl tank capacity: 10.
- LDrip tray capacity: 10.
- LDrip tray diameter: 410 mm.
- Oil temperature: 40-60°C Suction pressure: 0.7-0.8.
- Extraction pressure: 0.18.
- Air consumption: 90 l/min.
- Required air flow: 150 l/min.
- Total height: 150cm.
- Weight: 23kg.
- Set includes: 1x extractor 6x suction probes.
