

ROUND THREADING DIE M3X0.50MM

Brand: AWTOOLS
Reference: AW20423
EAN: 5903678628598

45g
WAGA

KEY FEATURES

- Made from hardened alloy steel, providing high resistance to wear and mechanical damage.
- Equipped with sharp internal cutting edges for accurate formation of external threads, ensuring clean and consistent results.
- Integrated chip through holes enable efficient chip removal, reducing the risk of jamming during operation.
- Features mounting holes and a V-groove slot for secure and stable installation in die holders, ensuring precise alignment during threading operations.
- Suitable for machining stainless steel, alloy steels, cast iron, and non-ferrous metals.
- Ideal for workshop, maintenance, and service applications requiring precise external threading of metal components.

TECHNICAL DATA

- Size: M3 x 0.50m.
- Standard: DIN 223.
- Weight: 45g.
