WAGA

KEY FEATURES

- Lightweight, durable spray gun with a powder-coated aluminium body for long-lasting performance and comfortable handling.
- Designed with an upper gravity-feed cup made of easy-to-clean, non-drip plastic.
- Working components – nozzle, needle, and air cap – are made of stainless steel, ensuring high resistance to corrosion and wear.
- Equipped with a trigger-operated mechanism and an adjustment knob for precise control of airflow and operating pressure, ensuring consistent and accurate application.
- Ergonomic, contoured handle provides a secure grip and reduces fatigue during extended use.

- HVLP technology ensures efficient material transfer, reducing paint consumption and overspray.
- Suitable for applying paints, varnishes, primers, and other liquid coatings in automotive, woodworking, and general finishing work.
