

MIDI IN-LINE FILTER-REGULATOR-LUBRICATOR W/ GAUGE 1/2"

Brand: AWTOOLS
Reference: AW10250
EAN: 5902198744788

1.8kg
WAGA

KEY FEATURES

- Combines a filter, regulator, and lubricator into one component.
- Made of durable material, anti-corrosion and wear resistant.
- Equipped with easy-to-read pressure gauge with PSI and BAR scale.
- Adjustment knob to tune in the desired pressure.
- Pressure regulators reduce and control air pressure in compressed air systems.
- Maintains a constant output pressure regardless of variations in the input pressure.
- Filter removes solid particles (dust, dirt, rust), and separates any liquids (water, oil) in the compressed air.
- Lubricator injects a stream of oil into an air line to reduce the friction of moving components of the pneumatic tools (valves, cylinders, and motors) and protects from corrosion, damage and extends service life.
- Metal guard with polycarbonate bowl for better visibility.
- Drain valve prevents build up of water in filter bowl.

TECHNICAL DATA

- Connection: 1/2".
- MIDIPressure input: 1-16 bar/ 230.
- Pressure output: 1-12 bar/ 175.
- Working temperature: 0-60°C Filtration grade: 5 µm.
- Weight: 1.8kg SHOP AT EMAST.PL.
