WAGA

A circular cross-section of a honeycomb structure, showing a central hole. The structure is composed of a regular hexagonal lattice of cells, with a central circular void.

- 
 - Made of a combination of quality diamonds, combined with resin and velcro backing.
 - Honeycomb flexible design enhances durability and longevity, minimizing wear and tear.
 - Easily conforms to edges and contours for a smooth, consistent polish.
 - Fits most 100mm velcro backing pads.
 - For use with angle grinders with adjustable speed.
 - Designed for polishing granite, marble, stone, ceramics, glass, and concrete without water.
 - Grain selection: G50 - edge polishing/ grinding
G100- edge alignment after cutting
G200+ - buffing to a perfect surface.

TECHNICAL DATA

- Diameter: 100 x 15 mm.
- Grit: 200.
- Max. speed: 3000 rpm.
- Application: dry polishing.
- Fastening: Velcro.
- Weight: 40 g.
